Apply for the manufacturing engineering PhD program and become a Fulton Fellow

The School of Manufacturing Systems and Networks at Arizona State University extends several Fulton Fellowships to new students pursuing a doctoral degree in manufacturing engineering. Be considered for four years of funding through this competitive program. All applicants will be considered for the Fulton Fellows program. No separate application is needed.

Eligibility
- Must have a master's degree in manufacturing, mechanical, materials science, computer science, industrial, electrical or equivalent engineering program.
- Preferred alignment with an MSN faculty member and/or identification with one or more of the fields or sectors on the right.
